## General Information

### Family Restroom Locations -

We have family restrooms available at the following locations:

- The north end of the Silverwood Coffee Roasting and Trading Company near the admission gates
- The Thunder Creek Relief Restrooms
- The Courtyard of Aftershock Roller Coaster
- Polliwog Restrooms (Only Available during Boulder Beach Operating Hours)
- The north end of Boulder Beach near Avalanche Mountain and Ricochet Rapids (Only Available during Boulder Beach Operating Hours)

Refer to the park map for these locations <https://www.silverwoodthemepark.com/park/park-map.php>

### Wheelchair, ECV, and Stroller Rentals

Wheelchairs, ECV's, and strollers are available for rent at the information center on a first-come, first serve basis. If needed, our staff has extra wheelchairs at bag check that can be used to get to the information center to rent an ECV or wheelchair.

### Wheelchair access (Shops, food, rides)

Engine #7 is wheelchair accessible. All other rides are accessible via wheelchair transfer. Alternate boarding for rides is available using our Courtesy Pass Program, available from the information center. More information can be found in the "Ride and Slide Information List" located at the end of this guide. All shops and food venues are accessible by wheelchair. If you would like additional assistance, inform any cast member that you would like to speak to a supervisor. We are happy to make reasonable accommodations.

### First Aid

First Aid has two offices, additionally they can provide care anywhere in the park. The First Aid offices are located between the Theatre of Illusion and Caramel Apples in the Dry Park, and right outside the Boulder Beach entrance in the waterpark. Basic First Aid supplies are provided at both locations. Basic medications such as Pain Killers, Allergies medication and anti-nausea are available for sale at both First Aid offices. Medications are also sold in all main retail stores

### Air Conditioned Locations

We have various buildings with air conditioning located throughout the park. They are as follows:

Main Street: Train Depot, High Moon Saloon, Main Street Theatre, Theatre of Illusion, Silverwood Coffee Roasting & Trading Co., General Stuff Mercantile, Curtiss' Candy Factory, Lindy's Restaurant, Victorian Coffee & Tea House.

Country Carnival: Huck's General Store and Toy Store.

Critter Camp: Mine Shack.

## Service Animals

Service Animals are welcome in the park, and are able to ride the Carousel and Old Engine #7. Due to safety restraint requirements, service animals are unable to ride other attractions.

We have 3 areas for service animals to relieve themselves:

- The Victorian Lawn.
- Next to the Cowboy Cowgirl restrooms.
- Next to Thunder Canyon Relief Station.

Owners are responsible to pick up after and/or clean after a service animal.

Under the ADA, a service animal is defined as a dog (or miniature horse) that has been individually trained to do work or perform tasks for an individual with a disability. The task(s) performed by the dog must be directly related to the person's disability. The dog must be trained to take a specific action when needed to assist the person with a disability.

Animals that do not meet the definition of a service animal are not allowed inside the park. For the health of your pet, do not leave them in the car while you're in the park. Law enforcement is notified about any animal left in a vehicle at Silverwood. If you are traveling with a pet, we recommend leaving them at a local kennel.

## Complimentary water

Silverwood has free drinking fountains at the following locations:

- Theater of Illusion Restrooms
- Cowboy/Cowgirl Restrooms
- Thunder Canyon Relief Restrooms
- Country Carnival Restrooms
- Polliwog Restrooms
- Rapid Relief Restrooms located by Avalanche Mountain

Free water refills are available at any location that provides soft drinks.

## Dietary Needs (Gluten Free etc.)

Silverwood Theme Park has many different dining options. Allergen information is listed on our website at <https://www.silverwoodthemepark.com/things-to-do/dining.php>

## Dress Code

All guests are asked to wear appropriate attire and no clothing or body art deemed by the park's management as vulgar, rude or containing derogatory language or graphics is allowed.

Dress Code While in Silverwood Theme Park

- Silverwood Theme Park requires shirts, shoes and appropriate dress.
- Swimsuits are not allowed.

#### Dress Code While in Boulder Beach Water Park

- Swimwear must be modest in design. No revealing or thong swimsuits allowed.
- Swim wear with exposed zippers, buckles, denim fabric, rivets or metal ornamentation is not permitted.
- For safety, diaper-aged children must wear swim diapers. Swim diapers are available at Boulder Beach Trading Company store for purchase.
- Guests must change into street clothes (shirts, shoes and appropriate dress) before returning to Silverwood Theme Park

#### Cutting in line and Place holding

Cutting in line and place holding are not allowed in lines. Anyone cutting in line may be removed from the park. Place holding is defined as holding a place in line for someone that is not in the line.

#### Inclement Weather

In the chance of rain storms or other severe weather conditions; some rides may be temporarily closed.

For your safety all pools, slides, and water attractions will be closed in the event of lightning.

The weather in Idaho changes often and, in most cases, lightning storms pass quickly. We will reopen all rides and attractions as soon as it is safe to do so.

## Ride and Slide Information

### Patron Responsibility (ASTM F770)

There are inherent risks in the participation in or on any amusement ride, device, or attraction. Patrons of an amusement ride, device, or attraction, by participation, accept the risks inherent in such participation of which the ordinary prudent person is or should be aware. Patrons have a duty to exercise good judgment and act in a responsible manner while using the amusement ride, device, or attraction and to obey all oral or written warnings, or both, prior to or during participation, or both.

Patrons have a duty to not participate in or on any amusement ride, device, or attraction when under the influence of drugs or alcohol.

Patrons have a duty to properly use all ride or device safety equipment provided.

### Courtesy Pass Program

The courtesy pass program is available for those needing additional assistance boarding rides, those who are unable to wait in line, or those that cannot access the ride through the rides main entrance. Those using the Courtesy Pass Program are able to board each ride through the ride's accessibility entrance, instead of the main entrance. The purpose of this program is to accommodate all guests, including those with a disability, and to provide an equal experience to everyone.

To obtain a Courtesy pass or additional information about the courtesy pass program stop by the Information Center or any ride location and speak with the ride operator.

## Measuring for Height Requirements

Height requirements for rides are met by the rider being measured from the bottom of their feet to the top of their head. Riders will be measured while standing with their feet flat on the ground. Riders will be measured with shoes on for the rides and without shoes for water slides. Contact a Rides, or Aquatics Supervisor for any additional assistance.

## Height bands

Height bands are available for guests that measure close to a height requirement. Show your height band to attraction attendants to indicate you have already been measured, and meet the height requirement. The attraction attendants will still double check heights to ensure the safety of our guests. To obtain a height band, or for more information, see the information center. You can also ask an attendant to call a supervisor.

## Ride Restrictions: Child Must Ride with an Adult

Some of our rides require that riders under a certain height be accompanied by an adult. In these cases an adult is defined as someone who is 16 or older who is able to be responsible for the child. An Adult is limited to taking either 1 or 2 children on a ride. The "Ride and Slide Information Table" has more information.

## Rides Restrictions: Infants

For safety reasons infants are unable to ride most attractions. Can ride Old Engine #7 and on the lap of an adult sitting on a bench of the Carousel. An infant is defined as a young child that is not able to hold themselves and is unaware of their surroundings.

## Casts or braces

Guests with casts or braces are not recommended to ride most attractions, and will be restricted from riding attractions where the cast or brace interferes with a ride restraint or endangers the rider or guests around the rider.

## Loose articles on Rides

On low and medium intensity attractions, most loose items are allowed on the rides as long as they do not: interfere with ride restraints, have the potential to be caught on ride machinery, or endanger the safety of anybody. On High intensity attractions no loose items are allowed.

Items such as hearing devices, oxygen tanks, hats and glasses should be removed/ stored with a non-rider to avoid loss/damage. Silverwood is not responsible for lost/stolen items.

## Go-Pro Policy

Go-Pros are approved on an individual basis, ride by ride, person by person, by a rides supervisor. Go-Pro cameras may not be secured to the ride unit, be hand held, be head mounted, or pose a safety risk to anybody. Generally secured wrist and chest mounts are approved. Hand held, head mounted, or go-pros that attach to ride units are not approved. If you have any questions, or would like approval please ask to speak to

a rides supervisor.

Rules may differ when visiting Boulder Beach depending on the attraction. Please be sure to check with an Aquatics Supervisor for clarification.

### Rider Switch Policy (Child Swap)

Some situations arise where not all guests in a group are able to ride an attraction at the same time. The following are some ride-switch situations and how they can be accommodated at the attractions. If additional assistance is needed, speak with the ride operator.

1. Two parents both want to ride an attraction but have a child that is too short/ does not want to ride.
  - a. Both parents should wait in line with the child.
  - b. Parent 1 rides the ride while Parent 2 waits with the child in the line.
  - c. After Parent 1 has ridden, Parent 2 rides while Parent 1 waits with the child in the exit.
2. Two parents both want to ride an attraction but have a child that is unable to wait in line for a stroller or any other reason.
  - a. Parent 1 waits in the line while Parent 2 waits at the ride exit with the child.
  - b. After Parent 1 has ridden, Parent 2 rides while Parent 1 waits at the ride exit with the child.
  - c. The parent waiting needs to communicate with the ride operator to inform them of the situation.
3. A parent has two children that both want to ride an attraction but each child is required to have an adult.
  - a. The parent can ride with child 1, while child 2 waits with a non-riding family member.
  - b. After child 1 has rode, child 2 may ride with the parent while child 1 waits with a non riding family member.
    - i. Be sure to inform the ride operator of your situation so we are able to assist in this process.

### Proper restraint usage

All restraints must be used as intended. Any seatbelts, lap bars, shoulder harnesses and any other safety device on each ride must be properly latched in order for a rider to be eligible to ride. In cases of rides with multiple safety devices, ALL must be used in order for a rider to be eligible to ride.

### Weight limits -

Some rides have weight requirements.

- Bumper Boats: maximum of 450 lbs. per boat
- Butterflir: maximum of 200 lbs. per rider
- Eagle Hunt: maximum of 300 lbs. Per rider, maximum 450 per tube
- Krazy Koaster: maximum of 242 lbs. per rider
- Polliwog Park Slides: maximum of 300 lbs. per rider
- Spin Cycle: maximum of 224 lbs. per rider
- Log Flume: maximum of 500 lbs. per boat
- Frog Hopper: maximum of 700 lbs. total of all 7 riders
- Rumble Falls: maximum of 400 lbs. per tube
- Ricochet Rapids: maximum of 800 lbs. combined weight per raft

See “Ride and Slide information list” at the end of this guide for more information.

## Size Limits

While most of our rides do not have weight restrictions, some of our attractions’ seats and restraints do not work well for riders of all sizes. For everyone’s safety, we cannot allow someone to ride if their restraint is not properly secured. We want your experience here to be as enjoyable as possible so we prepared some information in the “Ride and Slide Information Table” about the dimensions of the restraints at each attraction and hopefully you can get an idea about which rides will be accessible to you. This table is included at the end of this Accessibility Guide and on our website

<https://www.silverwoodthemepark.com/rides/size-guide.php>

You will see all our attractions placed in one of three categories based on how well they can accommodate riders of varying size. Rides in the “No Size Restriction” category should be suitable for riders of all sizes. Rides in the “High Size Restriction” category are the most restrictive, and are most likely to not be able to accommodate someone due to size. The intent of the categories is that if a guest is able to fit in one ride from a particular category he or she should be able to fit in most of the other rides in that category.

Any guest is welcome to come up through the exit of any ride and try out the seat and restraints for fit before they wait in line to ride.

Your safety is our highest priority and we appreciate your understanding.

## Pregnant individuals

Pregnant individuals are recommended not to ride any attractions due to manufacturer requirements, besides Engine #7 and Carousel.

## Testing seats by going up a rides exit

Any guest is able to go to a ride’s alternate entrance (Usually the ride exit) and test the seat and restraint system to check for fit before riding. If eligible the rider must then go through the ride’s normal boarding line to ride.

There are also 2 testing seat locations outside of the ride area for Spin Cycle and Stunt Pilot.

## Scared Children on Rides

Children can make irrational decisions when scared. In interest of their safety we will not start a ride if a child looks overly frightened. We ask the child if they want to ride and encourage them that it is safe. If the child still says they don’t want to ride we cannot start the ride even if the parents want us to.

## Prosthetics and Casts on water slides

Prosthetics and casts are allowed on water slides, however any exposed metal or tread that will touch the slide must be covered or wrapped. Towels or coban wrap may be provided upon request.

## Prosthetics on Rides

Prosthetic devices are not allowed on specific rides since they can become dislodged at high speed and pose legitimate safety risk to others. The rides affected with this are: Aftershock, Panic Plunge and Spin Cycle. For questions or possible exceptions, ask to speak with a ride supervisor.

## Ride and Slide information list

The following list describes in depth each ride's requirements, broken up into sections. The sections are as follows:

**Ride Requirements** – Lists every rider's height and weight requirement, as well as life jacket requirements.

**Persons who suffer from, or have a history of the following should not ride** – Lists every ride's restriction due to health conditions.

**Amputations and Paralysis Requirements** – Lists the minimum legitimate safety requirements of each attraction to be safely restrained by a rides restraint system.

**Restraint information** - Lists each ride's restraint system as well as measurements for each restraint's maximum fit.

**Alternative Entrance** - Lists each specific ride's entrance for boarding using the courtesy pass program.

### ***Comments, questions?***

We hope this guide assists you in your visit to Silverwood Theme Park. To give feedback or to get any additional questions answered, please call our guest relations department at 208-683-3400 extension 0, or email us at [info@silverwoodthemepark.com](mailto:info@silverwoodthemepark.com)

## Aftershock

**Ride Requirements:** 54 inches minimum to ride, 80 inches maximum

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, in doctors care, lack of muscle control, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee and two arms with any amputations below the elbow. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Minimal Size Restriction

**Restraint information:** This ride uses a locking over-the-shoulder restraint with a seatbelt. The seatbelt has a total circumference of 68". The horizontal clearance between the restraint and the back of the seat is 16".

**Alternative entrance:** Ride Exit

## Antique Cars

**Ride Requirements:** 48 Inches minimum without Adult (2 children per Adult)

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. This ride uses a gas pedal to control each individual car's speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Minimal Size Restriction

**Restraint information:** Up to 3 riders may sit side-by-side with a seat width of 32". A seatbelt is shared by all riders and has a total circumference of 83"

**Alternative entrance:** Ride Exit

## Avalanche Mountain

**Ride Requirements:** 42 inches minimum. Maximum of 4 riders over 48" at one time. Maximum of 6 riders if 2 or more are between 42" and 48"

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this slide will likely require the ability to hold on to two handles on the raft for the duration of the ride

**Size Restriction:** Minimal Size Restriction

**Restraint information:** No restraints.

**Alternative entrance:** Normal entrance. Speak with an Aquatics Supervisor for additional assistance or to arrange a boarding time.

## Barnstormer

**Ride Requirements:** 42 Inches minimum without Adult (2 children per Adult).

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, in doctors care, lack of muscle control, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Minimal Size Restriction

**Restraint information:** Each seat has a width of 16". This ride uses a bar restraint with 7" of vertical clearance between the bar and the bottom of the seat. The horizontal clearance between restraint and the back of the seat is 12".

**Alternative entrance:** Rides Exit

## Boulder Beach Bay (Wave pools)

**Ride Requirements:** N/A

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, or pregnant individuals

**Amputations and Paralysis Requirements:** N/A

**Size Restriction:** No Size Restriction

**Restraint information:** No restraints.

**Alternative entrance:** N/A

## Bumper Boats

**Ride Requirements:** 42 inches minimum without Adult (2 children per Adult), riders under 48 inches must wear a life jacket (provided at attraction) Maximum combined rider weight of 450 lbs max per boat

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Minimal Size Restriction

**Restraint information:** No restraints.

**Alternative entrance:** Rides Exit

## Butterflyer

**Ride Requirements:** 36 inches minimum. 200 lbs weight limit.

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, Dizziness, fear of heights, or pregnant individuals

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee and two arms with any amputations below the elbow. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** High Size Restriction

**Restraint information:** Each seat has a width of 18". This ride uses lap bar restraints with 6" of vertical clearance between the restraint and the seat. Horizontal clearance between restraint and back of seat is 10". This ride also uses a seat belt with a circumference of 40".

**Alternative entrance:** Rides Exit

## Carousel

**Ride Requirements:** 42 inches minimum without Adult (1 child per Adult on horses, 2 per Adult on benches

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, conditions that may result in injury or complication.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require the ability of the rider to hold themselves in an upright riding position for the duration of the ride. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Minimal Size Restriction

**Restraint information:** No restraints. The Carousel has bench seats next to the horses with a width of 38".

**Alternative entrance:** Rides Exit

## Climbing Trees

**Ride Requirements:** This attraction is meant for small children, as low crawl throughs and walkways are present

**Persons who suffer from, or have a history of the following should not ride:**

**Amputations and Paralysis Requirements:**

**Size Restriction:** High Size Restriction

**Restraint information:** No restraints.

**Alternative entrance:**

## Corkscrew

**Ride Requirements:** 48 inches minimum to ride

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two arms with any amputations below the elbow. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Minimal Size Restriction

**Restraint information:** This ride has locking over-the-shoulder restraints. The horizontal clearance between restraint and the back of the seat is 15" at the waist. The seat width is 14". This ride may be uncomfortable for taller riders with a maximum length of 29" from the shoulders to the seat.

**Alternative entrance:** Rides Exit, stairs are present

## Eagle Hunt

**Ride Requirements:** 42" minimum w/ supervising companion, 48" minimum without a supervising companion. Must ride with two riders. Individuals must weigh less than 300 lbs, and combined group weight must be between 150lb and 450lb.

**Persons who suffer from, or have a history of the following should not ride** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, lack of muscle control, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this slide will require the ability to hold on to two handles on the tube for the duration of the ride and maintain an upright, seated position.

**Size Restriction:** Must be below 300lbs.

**Restraint information:** No restraints

**Alternative entrance:**

## Elkhorn Creek (Lazy River)

**Ride Requirements:**

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, undergone recent surgery, conditions that may result in injury or complication, or pregnant individuals.

**Amputations and Paralysis Requirements:**

**Size Restriction:** No Size Restriction

**Restraint information:** No restraints.

**Alternative entrance:**

## Ferris Wheel

**Ride Requirements:** 48 inches minimum without Adult (2 children per Adult)

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Medium Size Restriction

**Restraint information:** Up to 3 riders may sit side-by-side with a seat width of 40". This ride uses lap bar restraints, as well as seat belts. When secured it has 9" of vertical clearance between the bottom of the restraint and the seat. It has 17" of horizontal clearance between the restraint and the back of the seat. The seat belt shared by all riders in a seat has a circumference of 56".

**Alternative entrance:** Ride Exit

## Flying Elephants

**Ride Requirements:** 42 inches Minimum without Adult (1 child per Adult)

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. Each rider can control the up and down movement of their elephant with a push button. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Minimal Size Restriction

**Restraint information:** Up to 2 riders sit side-by-side with a total seat width of 41". A shared seatbelt has a total circumference of 89".

**Alternative entrance:** Ride Exit

## Frog Hopper

**Ride Requirements:** 36 inches minimum. 700lb limit per ride cycle.

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** High Size Restriction

**Restraint information:** Restraint has 6" of vertical clearance between the lap bar and the seat, and 8" of horizontal clearance between lap bar and the back of the seat. This ride also uses seatbelts with 50"

circumference. The seat width is 19"

**Alternative entrance:** Ride Exit

## Kiddie Copters

**Ride Requirements:** 54 inches maximum

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. Also the ability to brace oneself using a handle against sudden changes in direction and speed. This ride uses a pull bar to raise and lower the helicopter during the ride cycle. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** High Size Restriction

**Restraint information:** Up to 2 riders sit side-by-side, and use a shared seatbelt with a circumference of 79".

**Alternative entrance:** Ride Exit

## Kiddie Wheel

**Ride Requirements:** 54 inches maximum

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** High Size Restriction

**Restraint information:** This ride uses a seatbelt.

**Alternative entrance:** Ride Exit

## Krazy Kars

**Ride Requirements:** 48 inches minimum

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, in doctors care, lack of muscle control, leg cast or splint, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee and two arms with any amputations below the elbow. Also the ability to brace oneself using a handle against sudden changes in direction and speed. This ride uses two handles to control each car's movement. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Minimal Size Restriction

**Restraint information:** This ride uses a seatbelt type restraints that is worn under the arms and across the chest. It has a circumference of 64"

**Alternative entrance:** Ride Exit

## Krazy Koaster

**Ride Requirements:** 48 inches minimum without Adult (1 child per Adult), 36 inches minimum to ride. 242 lbs per rider maximum.

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, in doctors care, lack of muscle control, Dizziness or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Medium Size Restriction

**Restraint information:** This ride uses a lap bar restraint . When secured, the restraint has 8" of vertical clearance between the lap bar and the seat. It has 13" of horizontal clearance between the lap bar and the back of the seat. The seat width is 19".

**Alternative entrance:** Ride Exit

## Panic Plunge

**Ride Requirements:** 48 inches minimum to ride

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back

problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee and two arms with any amputations below the elbow. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Minimal Size Restriction

**Restraint information:** Horizontal clearance between the restraint and the back of the seat is 16" at the waist and 8" at the shoulders. The seat width is 14".

**Alternative entrance:** Ride Exit

## Paratrooper

**Ride Requirements:** 48 inches minimum without adult

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Medium Size Restriction

**Restraint information:** Up to 3 riders sit side-by-side with a total seat width of 35". This ride uses a lap bar restraint. When secured, the restraint has 7" of vertical clearance and 12" of horizontal clearance.

**Alternative entrance:** Ride Exit

## Polliwog Park

**Ride Requirements:** Some slides require 36 inches minimum height. 300 lbs per rider maximum on slides.

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, or pregnant individuals.

**Amputations and Paralysis Requirements:**

**Size Restriction:** No Size Restriction

**Restraint information:** No Restraints

**Alternative entrance:**

## Puppy-Go-Round

**Ride Requirements:** 42 inches Minimum without Adult (1 child per Adult)

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. Each rider can control the up and down movement of their puppy with a push button. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Medium Size Restriction

**Restraint information:** Up to 2 riders sit side-by-side with a seat width of 26". A shared seatbelt has a circumference of 74".

**Alternative entrance:** Ride Exit

## Red Baron

**Ride Requirements:** 54 inches maximum

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. Also the ability to brace oneself using a handle against sudden changes in direction and speed. This ride uses a pull bar to raise and lower the plane during the ride cycle. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** No Size Restriction

**Restraint information:** This ride uses seatbelts with a circumference of 31".

**Alternative entrance:** Ride Exit

## Ricochet Rapids

**Ride Requirements:** 42 inches minimum. 800 lb maximum combined weight limit for up to 4 riders.

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this slide will likely require the ability to hold on to two handles on the raft for the duration of the ride.

**Size Restriction:** No Size Restriction

**Restraint information:** No restraints.

## Riptide Racer

**Ride Requirements:** 42 inches minimum

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this slide will likely require the ability to hold on to two handles for the duration of the ride.

**Size Restriction:** Medium Size Restriction

**Restraint information:** No restraints.

**Alternative entrance:**

## Roaring Creek Log Flume

**Ride Requirements:** 48 Inches minimum without Adult (2 children per Adult)

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, lack of muscle control, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee and two arms with any amputations below the elbow. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Minimal Size Restriction

**Restraint information:** No restraints. Seat width of 26"

**Alternative entrance:** Marked side entrance, near rides exit

## Round-Up

**Ride Requirements:** 48 inches minimum to ride

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will require the ability to stand for upward of 5 minutes at a time.

**Size Restriction:** Minimal Size Restriction

**Restraint information:** A chain is secured in front of each section. The section width is 26". The horizontal clearance between the back of the section and the chain is 21".

**Alternative entrance:** Ride Exit

## Rumble Falls

**Ride Requirements:** 48 inches minimum, 42 inches minimum with life jacket (Provided various locations within Boulder Beach). Maximum of 2 riders with a combined weight of 400lbs.

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, lack of muscle control, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this slide will likely require the ability to hold on to two handles on the tube for the duration of the ride.

**Size Restriction:** Medium Size Restriction

**Restraint information:** No restraints..

**Alternative entrance:**

## Salmon Run

**Ride Requirements:** Riders must be under 54" tall, unless riding with a rider under 54" tall on Chinook.

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, lack of muscle control, Dizziness, or pregnant individuals.

**Amputations and Paralysis Requirements:** Riders will require the ability to maintain an upright, seated position or lay flat on their back for the duration of the ride, and then step out of the runout.

**Size Restriction:** None

**Restraint information:** No restraints

**Alternative entrance:**

## Scrambler

**Ride Requirements:** 48 Inches minimum without Adult (2 children per Adult)

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, lack of muscle control, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Medium Size Restriction

**Restraint information:** Up to 3 riders sit side-by-side with a seat width of 39". A shared seatbelt has a circumference of 95".

**Alternative entrance:** Ride Exit

## Spin Cycle

**Ride Requirements:** 56 inch minimum without an adult (2 children per adult). 48 inch minimum to ride. 78 inch maximum. 224 lbs max per rider.

**Persons who suffer from, or have a history of the following should not ride:** Heart conditions, undergone recent surgery, conditions that may result in injury or complication, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee and two arms with any amputations below the elbow. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** High Size Restriction

**Restraint information:** This ride uses a locking over-the-shoulder restraint. The horizontal clearance between the restraint and back of the seat is 10". This ride has a maximum height restriction of 78".

**Alternative entrance:** Ride Exit

## Steam Engine Train

**Ride Requirements:** No Restriction

**Persons who suffer from, or have a history of the following should not ride:**

**Amputations and Paralysis Requirements:** Being safely restrained at this ride involves remaining seated for upwards of 30 mins. This ride is accessible without wheelchair transfer.

**Size Restriction:** No Size Restriction

**Restraint information:** No restraint.

**Alternative entrance:** Wheelchair ramp available near the back of the train.

## Stunt Pilot

**Ride Requirements:** Minimum of 48" to ride

**Persons who suffer from, or have a history of the following should not ride:** Neck, back, and/or heart problems or conditions, people who are pregnant, people that have recently undergone surgery, people with high blood pressure, patrons with excessive clothing which could interfere with the restraint having direct contact with the patrons body structure, patrons with prosthesis, due to the inability of the operator to fully assess how well any prosthetic is attached to the patron and the potential harm that can result from a potential detachment, Patrons with any health condition that they are aware of that may result in injury or complications such as recent illnesses or unusual sensations (e.g. headache, blurred vision or nausea).

**Amputations and Paralysis Requirements:** Patrons must have a minimum of (2) natural legs (including feet) and a minimum of at least (1) functioning hand. Note that the one functioning hand provides the patron with the ability to brace themselves during the ride and redistribute some of the loads induced on the patron, thus reducing the risk of injury and improving patron comfort. Operations must understand and apply this intent when judging if a patron can ride safely.

**Size Restriction:** Patrons must fit the seat/ restraint system correctly and allow the restraint system to properly engage as it was intended, with the minimum closure position met and the lap bar secure against the patron. Patrons may not use exaggerated force (by either patron or the operator) to close the restraint and meet the minimum closure position. Patrons of larger size or those who do not properly fit in the seats/ restraints may not ride. The lap bar must be able to close to a minimum closed position before the ride can dispatch.

**Restraint information:** Each coach is outfitted with an ASTM class 5 restraint system. It primarily consists of a padded lap bar with a ratcheting lock mechanism on either side to retain patrons. It also includes a pair of shoulder comfort straps.

**Alternative entrance:** Exit of the ride, stand before the yellow safety line and speak with an attendant.

## Thunder Canyon

**Ride Requirements:** 42 inches minimum without Adult (2 children per Adult), 36 inches minimum to ride

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, lack of muscle control, Dizziness, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Medium Size Restriction

**Restraint information:** This ride uses seatbelts with a circumference of 55".

**Alternative entrance:** The left side of the rides main line

## Tilt-A-Whirl

**Ride Requirements:** 48 Inches minimum without Adult (2 children per Adult)

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, in doctors care, lack of muscle control, Dizziness, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** No Size Restriction

**Restraint information:** No restraints.

**Alternative entrance:** Ride Exit

## Timber Terror

**Ride Requirements:** 48 inches minimum without an Adult (1 child per Adult), 42 inches minimum to ride

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, in doctors care, lack of muscle control, Dizziness, fear of heights, or pregnant individuals

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs

with any amputations below the knee. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made

**Size Restriction:** Medium Size Restriction

**Restraint information:** Restraint has 9" of vertical clearance between the lap bar and the seat. It has 13" of horizontal clearance between the lap bar and the back of the seat. The seat width is 14". This ride also has a seatbelt with a circumference of 68"

**Alternative entrance:** Ride Exit

## Tiny Toot Coaster

**Ride Requirements:** 42 inches minimum without Adult (1 child per Adult)

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** High Size Restriction

**Restraint information:** This ride uses a lap bar restraint with 9" of vertical clearance between the lap bar and the seat, 10" of horizontal clearance between the lap bar and the back of the seat, and a seat width of 19". This seat has limited leg room and may not work for tall riders.

**Alternative entrance:** Ride Exit

## Toddler Springs

**Ride Requirements:**

**Persons who suffer from, or have a history of the following should not ride:** Undergone recent surgery, or conditions that may result in injury or complication.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** No Size Restriction

**Restraint information:** No Restraints

**Alternative entrance:**

## Tremors

**Ride Requirements:** 48 inches minimum without an Adult (1 child per Adult), 42 inches minimum to ride

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, in doctors care, lack of muscle control, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:** Being safely restrained on this ride will likely require two legs with any amputations below the knee. Also the ability to brace oneself using a handle against sudden changes in direction and speed. Please ask to speak with a Rides Supervisor for clarification or to see if an exception can be made.

**Size Restriction:** Medium Size Restriction

**Restraint information:** Restraint has 14" of vertical clearance between the lap bar and the seat. It has 18" of horizontal clearance between the lap bar and the back of the seat. The seat width is 15". This ride also has a seatbelt with a circumference of 69"

**Alternative entrance:** Ride Exit

## Velocity Peak

**Ride Requirements:** 48 inches minimum to ride

**Persons who suffer from, or have a history of the following should not ride:** Neck problems, back problems, heart conditions, undergone recent surgery, conditions that may result in injury or complication, in doctors care, lack of muscle control, leg cast or splint, Dizziness, fear of heights, or pregnant individuals.

**Amputations and Paralysis Requirements:**

**Size Restriction:** Medium Size Restriction

**Restraint information:** No Restraints

**Alternative entrance:** N/A
